ARYAN RACHA

Dadar, Mumbai | +91 85914 93883
aryanracha@gmail.com | linkedin.com/in/aryanracha | github.com/aryanracha

Summary

Aspiring Software Developer with strong backend fundamentals and hands-on experience building AI-integrated and cloud-based applications. Passionate about problem-solving, understanding technical implementations, planning implementation effectively, and applying modern tech stacks to build effective solutions.

Education

Vidyalankar Institute of Technology, Mumbai | B.E. in Computer Engineering – 9.2 CGPA 2023 – 2027
Maharashtra State Board | HSC – 72.66% & SSC – 76.33% 2021 – 2023

Technical Skills

Programming Languages: C, Java, Python, TypeScript
Frontend: HTML5, CSS3, JavaScript, React.js, Next.js
Backend: Node.js, Express.js, FastAPI
Database: MongoDB, PostgreSQL
DevOps: Docker, Git, GitHub Actions, Jenkins, Google Cloud Platform

Notable Projects

GitAmi | github.com/gitamilabs/gitami

- Built an AI-powered **codebase management** and **auditing platform** that connects with GitHub repositories via GitHub Apps to automate code reviews, blast-radius analysis, and repository intelligence.
- Engineered a dual-engine **knowledge base** combining **Neo4j graph** databases for AST symbol and dependency mapping with **ChromaDB vector** databases for semantic code search.
- Designed an **incremental re-indexing** pipeline with resilient chunking, size sanitization, and webhook synchronization to process codebase diffs efficiently without full re-indexing.
- Developed specialized autonomous **agent workflows** for automated pull request evaluations, architectural risk assessments, and real-time interactive **codebase chat** with verifiable code citations.

Tech Stack: Next.js, TypeScript, Bun, Python, FastAPI, GitHub Apps, PostgreSQL, Neo4j, ChromaDB, Docker

Construx | github.com/suhasarali/construx

- Built a **construction management** platform featuring **role-based** workflows for Managers, Site Engineers, and Workers across web and mobile applications.
- Implemented **geofenced attendance** with AI-based **face recognition** and QR-based **tool checkout**, return tracking, and availability management.
- Developed **material request** and **approval workflows** with **purchase order generation** and inventory updates to streamline resource management.
- Integrated Daily Progress Reports (DPR), task assignment, invoicing, and petty cash tracking to support construction site operations.

Tech Stack: React Native, Next.js, Node.js, Express.js, MongoDB, JWT Authentication, Razorpay

FairHire | github.com/aryanracha/fair-hire

- Built an AI-powered **hiring platform** enabling recruiters to create jobs, generate **shareable** resume upload links, and intelligently screen candidates.
- Developed a Python **FastAPI ML service** to extract resume data, perform **rule-based filtering**, and rank candidates using **XGBoost model**.
- Integrated **LIME explainability** to highlight factors influencing candidate rankings and make model predictions easier for recruiters to interpret.

Tech Stack: React, Node.js, Express.js, Python, FastAPI, MongoDB, XGBoost, LIME, PyMuPDF, Cloudinary

Certifications & Achievements

- Completed a 2-week **Introduction to Cloud Computing** Course In-person at **CDAC** working on Google Cloud Platform Services like VMs, VPC, IAM, Cloud Functions, Cloud Storage, BigQuery, Pub/Sub, Cloud Run, etc.
- Qualified for **6 hackathons** (2 online + 4 offline) working on technical architecture, implementation planning, backend development, API integration, and deployment.
- Solved **283+ coding problems** across contests & platforms like LeetCode, Codechef, Hackerrank on topics like Data Structures, Recursion, Backtracting, Trees, Graphs, etc.
- Won **4 Coding Competitions** at Vidyalankar Institute of Technology.
